

TECH MEMO

To: ACT Competitors
From: ACT
Date: October 25, 2017
Subj: 2018 ACT Motor Options – GM 603 and 604

Over the past year and a half, ACT has tested the viability of introducing the GM 604 crate engine into our program. This has involved close monitoring of 8 competitors throughout the ACT system, and the results of that testing have been very positive, matching the 604 up from a competition standpoint with the current 603.

As a result, ACT will allow the 604 into competition beginning with the 2018 season, **BUT PLEASE BE ADVISED THAT THE 603 REMAINS THE PREFERRED MOTOR AND WILL REMAIN AS AN APPROVED ENGINE IN THE ACT SYSTEM.** In keeping with ACT's long-standing philosophy of cost containment, this enables competitors to retain their 603s with confidence that neither the 603 or 604 has a competitive edge over the other.

We are currently reviewing rules, and anticipate distributing them to you in the next few weeks.
